SUMMARY

Android Developer with 3 years of experience building and shipping production Android applications used by thousands of SME users. Experienced in Kotlin, Jetpack Compose, MVVM, Clean Architecture, offline-first systems, performance optimization, and production debugging. Hands-on experience with Google Play releases and end-to-end Android delivery.

PROFESSIONAL EXPERIENCE

Android Developer 09/2023 – Present | Nagpur, India

Tacktile Systems Private Limited

Business accounting and invoicing platform serving thousands of SME users.

- Built and shipped **5 production features from scratch**, including multi-currency invoicing, credit notes, customer/product categories, and invoice image attachments, expanding core functionality for thousands of SME users.
- Developed and maintained invoice, estimate, receipt, payment, and **multi-currency workflows**, including exchange-rate and gain/loss calculations.
- Designed **offline-first synchronization** using SQLite and ZIP compression, improving reliability and reducing network payload in low-connectivity environments.
- Optimized SQLite queries through strategic indexing, **reducing complex query execution time by ~30%**, and improved RecyclerView performance for large datasets.
- Identified and eliminated production memory leaks using **LeakCanary and Android Profiler**, while refactoring legacy modules toward MVVM architecture to improve maintainability and stability.
- Diagnosed production issues and contributed to **Google Play release management**, including app builds, testing, versioning, release preparation, and production deployments.

SKILLS

Languages: Kotlin, Java, SQL

Android: Jetpack Compose, XML, Android SDK, Material Design 3, Navigation Component

Architecture: MVVM, Clean Architecture, Repository Pattern, Use Cases, Offline-first Architecture

Asynchronous Programming: Coroutines, Flow, StateFlow, SharedFlow, LiveData

Storage: Room, SQLite, Firebase

Networking: Retrofit, OkHttp, REST APIs, Gson

Dependency Injection: Hilt, Dagger 2

Performance: LeakCanary, Android Profiler, Crashlytics

Testing: JUnit, Mockito, Unit Testing

Release & Tools: Google Play Console, Play Store Deployment, Git, GitHub, Bitbucket, Android Studio, Jira, Postman, Gradle

PROJECTS

Expenzo — Expense Tracker | Google Play

Kotlin • Jetpack Compose • MVVM • Room • Coroutines • Hilt

• Built an Android expense-tracking application using **Kotlin, Jetpack Compose, MVVM, Room, Coroutines, Flow, and Hilt**.
• Wrote **unit tests using JUnit and Mockito** to validate application/business logic and improve code reliability.
• Published and managed the application on **Google Play**, handling Play Console configuration, testing, versioning, release builds, and production deployment.

News App — Android Architecture Migration

Kotlin • XML • Jetpack Compose • Dagger 2 • Hilt • MVVM • Coroutines • Flow

• Built the same News application across **three migration stages: XML + Dagger 2 → Hilt → Jetpack Compose**.
• Integrated **REST APIs** to fetch and display news content, implementing the networking/data flow using Retrofit and modern Android architecture.
• Migrated Dagger 2 to Hilt and XML UI to Compose while implementing reactive state management with **ViewModel, StateFlow, and Coroutines**.

EDUCATION

Bachelor of Engineering (B.E.) in Civil Engineering 09/2019 – 09/2023 | Nagpur, India

Priyadarshini J.L. College of Engineering - PJLCE

CGPA: 7.73 / 10
